## BOMBARDIER SNOWMOBILES

# All purpose WINTER VEHICLES

### MODEL R-12

#### GENERAL SPECIFICATIONS

Capacity	12 passengers or 2,000 lbs.
Engine	Chrysler Industrial 251 — 115 H.P.
Transmission	3-speed forward one reverse
Differential	Hypoid ratio 4.1 to 1
Rear suspension	8 Independent wheels
Rear tracks	Rubber and steel (endless) — 17½ inc. wide, 22½ feet overall length
Track belts	Rubber reinforced with steel cable (endless)
Ski dimensions	60 inches x 12 inches
Rear tires	4.50 x 16, 4 ply
Width center to center of tracks	42 inches
Front suspension	Coil springs
Chassis	Toboggan type entirely enclosed
Body	All steel completely welded
Weight	4,500 lbs.
Overall length of unit	17 feet, 8 inches
Overall width of unit	59 inches
Cruising speed	25 - 30 M.P.H.
Maximum speed	45 M.P.H.

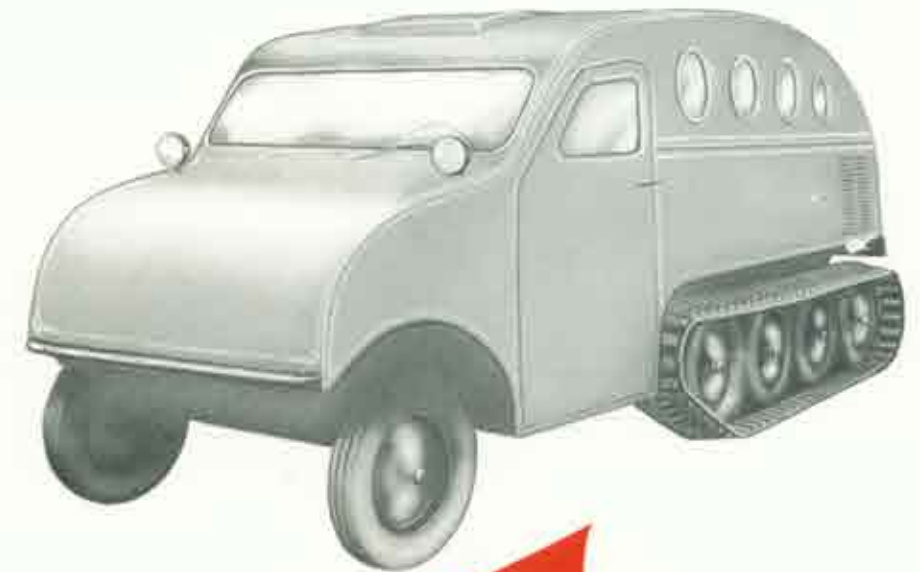

Bombardier Snowmobiles are now the accepted means of travel everywhere where snow and other conditions make all other passenger conveyances impractical. The Snowmobile has revolutionized winter transportation and has become an integral part of every day living in hundreds of snow-bound regions.

Models R-12 and R-18 are the proud successors to models B-12CS and C-18S, both of which have been and are still widely used throughout snowed-under areas. These new Bombardier models have been made even more useful with the adaptation of standard front wheels interchangeable with skis. They can now be used 365 days a year in all sorts of operations, not only on snow, but on marshy land, muddy soil or soft ground. They travel as easily cross-country as they do on the open road. Their traction power has been as thoroughly tested and proven over marshy or muddy ground as it has over deep snow. Where other means of transportation fail, the Bombardier will succeed well beyond the possibilities of any other form of standard motor transportation.

The ways in which Bombardier Snowmobiles may be used are far too numerous to mention. They are the most versatile vehicles ever designed, and they are being used in a variety of operations which defies the imagination.

With its narrow tread width, the R-12 is much in demand by forest industries owing to the ease with which it can be maneuvered almost anywhere in the woods.

Model R-18, with its larger seating capacity and greater loading space is favored by transportation companies, school boards and other bodies requiring wider winter vehicles.

### MODEL R-18

#### GENERAL SPECIFICATIONS

Capacity	15 passengers or 2,500 lbs.
Engine	Chrysler Industrial 251 — 115 H.P.
Transmission	3-speed forward one reverse

# BOMBARDIER SNOWMOBILES PROVIDE THE ANSWER

*to your winter transportation and travel problems*

*They are powered by CHRYSLER engines*

# BOMBARDIER SNOWMOBILES

WHAT THEY DO

## **AMBULANCE :**

Bombardier Snowmobiles render invaluable service as ambulances in all sorts of emergencies : storms, snow blocked roads, etc.

## **DOCTORS :**

No country doctor need now be handicapped by weather or ground conditions in spring, fall, or winter. He can speedily answer any call in a Bombardier Snowmobile.

## **FISHING :**

Bombardier Snowmobiles are a boon to commercial fishing. They can carry fresh fish to consumers or shipping points rapidly and efficiently.

## **POSTAL SERVICE :**

Isolated communities, even in the most remote districts, can enjoy postal delivery every day with a Snowmobile.

## **WINTER BUSES :**

Bus service is never interrupted by a snow storm when passengers are carried safely and rapidly in a Bombardier.

## **PROSPECTORS :**

In their search for claims, many prospectors have found the Bombardier Snowmobile an indispensable ally over snow and marshy grounds.

## **PUBLIC UTILITIES :**

Efficient telephone and hydro-electric

service is maintained at all times by companies who use the Snowmobile to answer service calls during storms, and in off-highway places.

## **SCHOOL BUSES :**

Many school boards have adopted the Bombardier snowmobile to convey children to and from school during the Winter.

## **SPORTS :**

Anglers, hunters, skiers, guides, fishing resort operators find things much more enjoyable when they travel in a comfortable Bombardier Snowmobile.

## **FOREST INDUSTRIES :**

While the main job performed by Snowmobiles in the lumber and pulp and paper woodlands operations is the hauling of log trains, they are also widely used for the transportation of men and supplies to the camps.

## **RESCUE WORK :**

Countless people owe their lives to the timely help brought to them during or after snowstorm by rescue parties using Snowmobiles.

## **TRANSPORTATION :**

For wintertime general delivery, nothing can beat a Bombardier. The Snowmobile can be loaded with goods or hitched on to a sleigh to deliver supplies in isolated regions with ease and total dependability.
